EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Lawrence Stahl on 3/27/08.

It was agreed to cancel claims 13-17.

REASONS FOR ALLOWANCE

2. Claims 3-5, 6, 8-10 and 18-22 are allowed.

Following is the Examiner's statement for reasons of allowance.

The prior art of record Gotoh et al and Renda et al fail to suggest or disclose the collective feature of the invention such as: "control means controls said transfer means to wait and receives next transfer permission/denial information that permits transfer of the print data while the time for waiting is not more than a predetermined period of time, said control means controls said transfer means to abort waiting, and to transfer the print data to the ink-jet printing apparatus" collectively with the other features of the claim renders **claim 3 and 18** allowable. The limitations of "control means controls said transfer means to wait and the time for waiting exceeds a predetermined period of time, said control means checks an operation state of the ink-jet printing apparatus on the basis of the operation information, and when the operation state indicates a predetermined operation state, said control means controls said transfer means to

continue to wait” in combination with the rest of the claim's limitation renders **claim 4 and 19** allowable.

The limitations of “control means controls said transfer means to wait and the time for waiting exceeds a predetermined period of time, said control means checks an operation state of the ink-jet printing apparatus on the basis of the operation information, and when the operation state indicates an unrecoverable error state, said control means aborts waiting and informs of an abnormality of the ink-jet printing apparatus” in combination with the rest of the limitations renders **claim 6 and 20** allowable.

The limitations of “wherein when said control means controls said transfer means to wait, said control means checks an operation state of the ink-jet printing apparatus on the basis of the operation information, and when the operation state indicates a predetermined operation state, said control means controls to reset the time for waiting which is being measured” in combination with the rest of the limitations renders **claim 8 and 21** allowable.

The limitations of “control means controls said transfer means to wait and the time for waiting exceeds a predetermined period of time, said control means aborts waiting, and informs of an abnormality of the ink-jet printing apparatus” in combination with the rest of the limitations renders **claim 10 and 22** allowable.
